GLC 2600 Software Installation Guide

The "GLC2600 Add-on Kit" software allows you to use data created with GP-PRO/ PBIII for Windows Ver. 5.0 or later and Pro-Control Editor Ver. 3.0 or later with a GLC2600 Series unit. The following information explains how to install this software on your Windows® compatible personal computer. Please be sure to read these instructions prior to installing this software.

■Prior To Installation

Close (Quit) all programs other than the Installer program. This includes both standard applications and resident (virus detection programs, etc.) programs.

■Installation Method

Normally, simply inserting the CD-ROM into your PC's CD-ROM drive will automatically start the installation program. However, if it does not, use the following steps to start your CD-ROM's "Setup.exe" program.

1) Insert the CD-ROM into your PC's CD-ROM drive.
2) Click on the "Start" button in the bottom-left corner of your screen, and then click on "Run".
3) Enter "X:\Setup.exe" in the command line and click on OK. (Here, "X" indicates the character of your CD-ROM drive.)

■Usage Cautions

- This product is designed to be used with the following software.

    GP-PRO/PBIII for Windows Ver. 5.0 or later

    Pro-Control Editor Ver. 3.0 or later

    If earlier versions of the software are present, an error will occur and the installation will halt. In this case, please contact your local GLC representative for assistance. You can find your software's version information in the main menu screen, in the "Help" pull-down menu.

- The GP-PRO/PBIII for Windows Ver. 5.0 and Pro-Control Editor Ver. 3.0 manuals were created prior to the release of the GLC2600 Series unit. Therefore, when reading these manuals, please think of the names "GLC2400" and "GP-2600" as the "GLC2600".
