

Checking test information on a tablet improves work efficiency.

Before

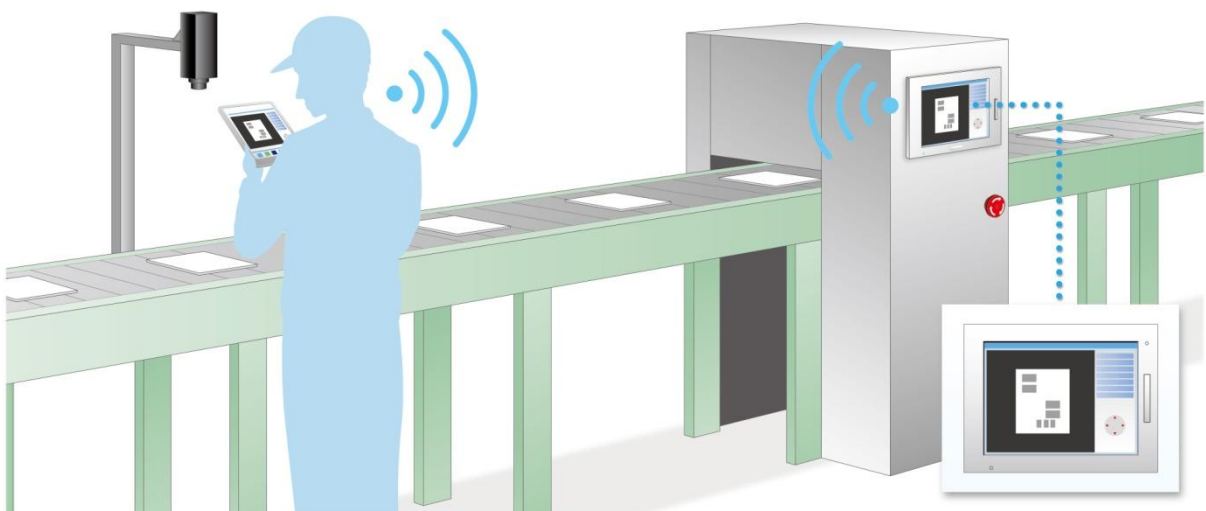

Test information is displayed on a PC. When an alarm occurs, work efficiency is low because I have to come and go many times to check the PC's screen and work to cope with it.

Using PS5000

After

You can check the PC's screen on a tablet. Because you can check test status in front of work, unnecessary traveling is cut out.

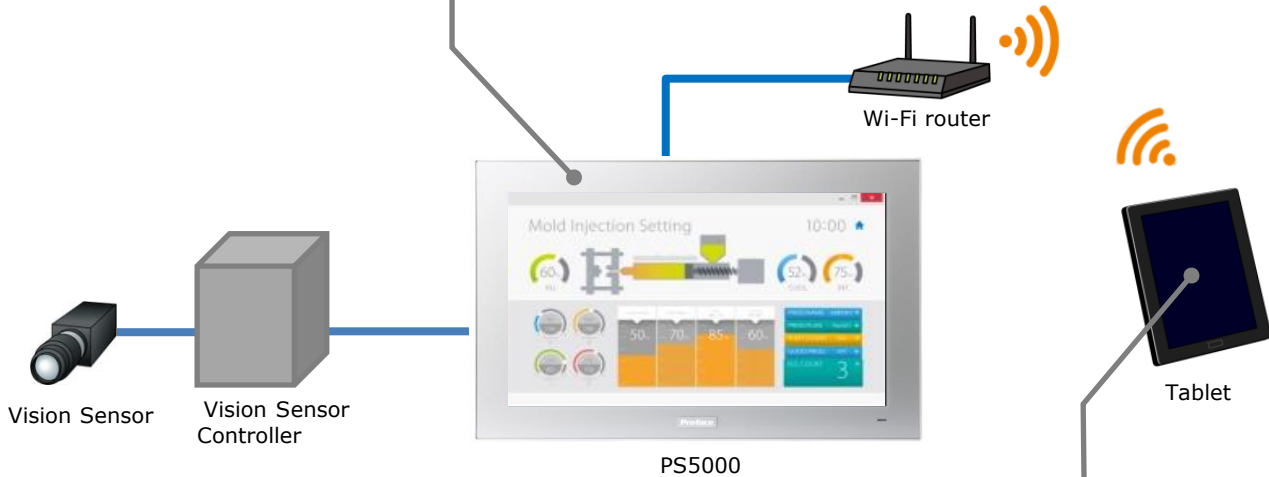

No more work depending on memory. Reduce mistakes.

System Configuration

PS5000 that is an industrial computer has comfortable operability like HMI and also high data-handling ability like a PC.

Comfortable operation is possible.
 Can be used as an operation terminal with use of Runtime Engine, WinGP.
 Can connect to various devices with a range of drivers without any programming.

Check PC screens on a tablet.
 Using Pro-face Remote HMI Server allows you to monitor and run Windows applications existing in PS5000 on a tablet.

What is PS5000?

It's an industrial computer that has achieved the top class performance in the industry and flexible connection with a range of devices.
