

9403 Addendum

9403 Monitors Incorporating Horizontal Video Display Adjustment Controls

Your monitor may incorporate horizontal—rather than vertical—video display adjustment controls, as shown in the following figure.

Note

Some manual user adjustments may be needed when using this particular monitor in 1024x768 interlaced mode, as well as when shifting between video modes.

The following table describes the back panel components on this monitor.

Component	Description
Power Switch	Position this switch to Off (switch should be out) until the system is properly configured and connected to a 95/260 VAC power source.
Power Receptacle	Located to the right of the Power switch, a grounded cable must be securely positioned before turning power ON (1).
Video Connector	Connect the video cable from the video controller to this 15-pin video connector. The pinouts for the connector are provided in Appendix B of the manual.
Video Display Adjustment Controls	Use these controls to adjust the video display's contrast, brightness, and vertical/horizontal position and size.

Note

The electrical specifications for this monitor are 95/260 VAC, 50-60 Hz.
