Subject: ELO Touchscreen Driver Installation For Windows NT 3.51 or 4.0   AN# 1051B
Date: 11/8/96
Name: Shiu Moy
Page: 1 of 2

Description: Procedure for installing ELO Touchscreen Drivers for Windows NT 3.51 or 4.0

1. Insert the Touchscreen driver disk and type INSTALL at the prompt

    INSTALL.BAT performs the following functions:

    COPY MONMOUSE.SYS C:\WINNT\SYSTEM32\DRIVERS
    COPY ELOCALW.CPL C:\WINNT\SYSTEM32
    COPY ELOCALW.HLP C:\WINNT\SYSTEM32
    COPY NULL.CUR C:\WINNT\SYSTEM32
    COPY REGINI.EXE C:\WINNT\SYSTEM32\DRIVERS
    COPY MONMOUSE.INI C:\WINNT\SYSTEM32\DRIVERS

2. Go to the C:\WINNT\SYSTEM32\DRIVERS directory and change the MONMOUSE.INI file
    using the following parameters:

    ControllerModel = REG_DWORD

                                2201(PC-Bus)
                                2210(Serial)
    ControllerType = REG_DWORD

                                0 (Serial)
                                1 (PC-Bus)
    ControllerVector = REG_DWORD

                                4 (Serial Com 1)
                                3 (Serial Com 2)
                                5 (PC-Bus)
    ControllerLevel = REG_DWORD

                                4 (Serial Com 1)
                                3 (Serial Com 2)
                                5 (PC-Bus)

Page: 2 of 2

Description: Procedure for installing ELO Touchscreen Drivers for Windows NT 3.51 or 4.0

ControllerAddress = REG_DWORD
> **0x3f8 (Serial Com 1)**
> **0x2f8 (Serial Com 2)**
> **0x280 (PC-Bus)**

3. You must now run the following command line in a DOS Prompt Window:

    C:\WINNT\SYSTEM32\DRIVERS\REGINI MONMOUSE.INI

4. Restart the computer.

5. Open Windows NT Control Panel and double click the Touchscreen icon.
Click the Calibration button and follow the setup procedures. After you are finished calibrating you
should be able to use your touchscreen.
