Description: How to use Windows Terminal Program to Backup/Restore to 20XX/481X

#### **Backuping Up Your Application:**

1. Select Receive Text File from the Transfers Menu and Figure 5 will appear.

- 8. Select the Backup option from the Backup/Restore screen on your Xycom unit.
- 9. You will be given three option (<P>rograms, <R>egister Values, or <A>ll). Select Programs and then select "All" for all of the program blocks.
- 10. The Xycom system should then start downloading and Windows terminal should echo the characters across the screen.
- 11. Make sure that you select "Save Controls" in the bottom right corner of the dialog box before hitting the "OK" button. If this is not selected your application will not download properly.
- 12. After completing you backup select the Verify option on the Xycom unit and send the program back to the Xycom unit as instructed on the next page. This will verify that your program was saved properly.

#### **To Restore Your Program:**

1. With the same communcation settings, as shown on page 1, select the Send Text File from the Transfer Menu and Figure 6 will appear.

	Send Text File	
File <u>N</u> ame: <sup>•</sup> .txt test.txt	Directories: c:\2000apps\oil ┌─ c:\ ┌─ 2000apps ┌─ oil	OK Cancel
\$	4	Following CR:
List Files of <u>Type:</u> Text files(*.TXT)	Dri <u>v</u> es: c: ms-dos_6	Append LF Strip LF

Figure 6

- 8. Select the Restore option from the Backup/Restore screen on your Xycom unit.
- 9. The Xycom unit will then be ready for accepting a program
- 10. Make sure you deselect the "Strip LF" option before selecting the OK button. If this is not deselected your download will not work properly.
- 11. You can also select the Verify option on the Xycom unit to make sure that you program was restored properly.
